ABOUT SENSUS

Love your Conversations.

SENSUS Communication Solutions is an end-to-end communication devices and collaboration solutions provider. For over 30 years, we have partnered with leading manufacturers of telecommunication and collaboration technology to better connect businesses across Canada. We have three main offices in Vancouver, Toronto, and Montreal, which are paired with dozens of satellite offices across the country.

Collaborating and communicating with your team anywhere around the world has never been so easy. Remote workers, road warriors, and executives around the boardroom table can collaborate via video as if everyone was physically present in one room. Present content wirelessly and collaborate easily with technology that works. The benefits are obvious.

SENSUS holds the highest level partner status of many industry-leading, best in class video conferencing providers such as Polycom, Lifesize and StarLeaf. SENSUS also provides collaboration tools such as JTouch Interactive Displays, eBeam, ClickShare, and others to create a user-friendly boardroom environment that will transform your next meeting.

OUR PARTNERS

Our strong direct partnerships include nothing but best-in-class leading technology manufacturers. We know these brands inside and out and foster amazing relationships with their people too. In order to match the evolving demands of modern businesses our portfolio of brands is constantly changing as new manufacturing partnerships are created.
